

Net incremental healthcare cost

Scenario 1: one secondary infection per HIV, HBV, HCV infection

Scenario 2: TTBI-sepsis benefits excluded

- Cost saving, ICER < \$0 per DALY averted
- Very cost-effective, ICER < 1x per-capita GNI
- Cost-effective, ICER < 3x per-capita GNI
- Not cost-effective, ICER >= 3x per-capita GNI
